Inclusion Support Programme Guidelines

2016-2017 to 2018-2019

Version 1.3

A3.3 Process and conditions for accessing the SEL

A service's need for specialist equipment must be identified in its SIP (see Section A2.2), or be recommended by a relevant professional, such as an occupational therapist or physiotherapist, with knowledge of the child's biomechanical functional needs.

If equipment is recommended by a relevant professional, the IA must endorse and agree to the recommendation prior to a SEL application being submitted.

It is the responsibility of each ECCC service accessing equipment from the SEL to ensure it is fitted by an appropriate professional. In some cases the IA may be suitable, but in other cases an occupational therapist or physiotherapist who has knowledge of the child's biomechanical functioning and needs may be required.

A service seeking equipment from the SEL must sign a Loan Agreement Form with its IA prior to accessing equipment, which sets out the Terms and Conditions associated with borrowing equipment from the SEL.

The process for accessing equipment from the SEL, including expected timeframes, transportation arrangements, return arrangements and the Terms and Conditions associated with borrowing the equipment are determined by each IA and may vary across jurisdictions.

Eligible ECCC services can access information about the SEL directly from its IA. Contact details for the IA in each jurisdiction are available on the [department's website](#)

1. Activity Chairs and Seating

High Complexity Chairs

Jenx - Bee Seating Unit

A fully adjustable, modular seating system specifically designed for young children from 4 months through to 5 years.

The Bee seating system is an ideal introduction to supported functional seating.

It provides an outstanding level of versatility via fixed and height adjustable base options, along with a wide variety of head, trunk, leg and foot support options.

Size:

Age range: 4 months to 5 years

Min seat / max seat depth: 110-350mm

Max user weight: 25kg

Equipment measurements: - H 100CM W 58CM L 87CM

<p>Jenx - Giraffe Chair</p>	<p>The giraffe chair is suitable for a child who needs extra seating support.</p> <p>It can be adjusted to accommodate a child from approximately 12 months to 5 years, and includes a range of adjustable positioning supports.</p> <p>The giraffe chair can be used with a tray, or pushed up to a table without a tray (depending on table height) to enable participation in group activities.</p> <p>Equipment measurements: - W 30CM H 53CM L 46CM</p>	 <p>A wooden giraffe-shaped chair with orange spots, mounted on four black wheels. It features a black seat and backrest, and a grey tray with an orange border attached to the back. The giraffe's head is at the front, and its body forms the main structure of the chair.</p>
<p>Jenx - Junior Chair</p>	<p>The Jenx Junior Chair is a fully adjustable contoured modular seating system.</p> <p>It has tilt in space with a hydraulic or powered base.</p> <p>The system provides excellent postural support for a wide range of users.</p>	 <p>A black and red modular seating system on four black wheels. It has a red seat and backrest, and a grey tray with a black border. The base is black and appears to be adjustable. The chair is shown from a side-rear perspective.</p>

<p>Leckey - Advance Chair</p>	<p>The advance chair is suitable for a child who needs maximum seating support.</p> <p>It includes a range of adjustable positioning supports.</p> <p>The advance chair is height-adjustable and can be used with a tray, or pushed up to a table without a tray to enable participation in group activities.</p> <p>Equipment measurements: - H 145CM W 60CM L 75CM</p>	
---------------------------------------	--	---

<p>Leckey - Everyday Seat</p>	<p>Designed specifically for children or young adults with moderate needs who still require pelvic stability but do not need the same advanced level of support as those with complex needs.</p> <p>Sizes 1 and 2.</p>	
<p>MediFab Discovery Shuttle Seat on a Launcher Base</p>	<p>The Launcher Base has been designed to be used with the Spex Discovery Seating System and can be raised for table height activities or lowered for floor level activities. Use the tray (optional) for feeding or play.</p> <p>Ultra-lightweight & compact. Tilt-in-space seating.</p> <p>Recline adjustment. Growth-adjustable. Wipe-down upholstery.</p>	

Moderate Complexity Chairs

Brookfield Chair with Mobility Base

The Brookfield is a robust chair for children from the age of 2 years who require moderate levels of postural support when seated.

The Brookfield has a unique moulded back which promotes central alignment and gives additional support whilst your child is seated.

Its seat height and depth can also be adjusted to suit. As an additional feature, the back can be adjusted in height.

The Brookfield comes complete with a moulded back, contoured seat, pelvic strap and height adjustable arms as standard.

A static or mobile version is also available as well as a choice of high or low back. Available as a static or mobile chair.

<p>Leckey - Easy Seat</p>	<p>The Easy Seat is suitable for a child who needs a kinder chair with extra support.</p> <p>It has adjustable armrests, footplate, and pommel, and additional side supports are available.</p> <p>Available in sizes 1, 2, and 3, each of which can be adjusted for growth.</p> <p>It is height-adjustable to enable a child to sit at a kinder table and participate in group activities.</p>	
<p>DES - Kelly Chair</p>	<p>The Kelly chair is suitable for a child who needs a kinder chair with extra support. It has adjustable armrests, footplate, and pommel and tray.</p> <p>Available in pre-school and primary sizes, each of which can be adjusted for growth.</p> <p>It is height-adjustable to enable a child to sit at a kinder table and participate in group activities.</p> <p>Measurements of chair: - W 33CM H 55CM L 45CM</p>	

<p>Star X Chair</p>	<p>The Star X Chair is suitable for a child who needs extra seating support.</p> <p>It will accommodate a child from approximately 12 months to 4 years.</p> <p>It includes a range of adjustable positioning supports including thoracic, hip, and foot supports.</p> <p>The Star X Chair can be moved up to a table (depending on table height) to enable participation in group activities.</p> <p>Equipment measurement: - H 70CM W 43CM L 60CM</p>	 <p>A bright blue, high-back, four-wheeled chair with adjustable armrests and a footrest. It features a black safety harness and a black handle on top for easy movement.</p>
<p>Medifab – Neat Zeat Seating System</p>	<p>The Neat Zeat offers a modular indoor seating solution for activity, feeding and learning opportunities. Constructed of durable hardwood with a lacquer finish. Height adjustment grooves on the frame provide a huge growth range that can be easily adjusted with an Allen key. Three packages are available, with the addition of further accessories to script according to individual requirements. Neat Zeat is previously known as the Zeat Seat.</p>	 <p>A wooden, four-wheeled seating system with a black seat and backrest. The frame is made of light-colored wood with visible adjustment grooves and holes. It includes a footrest and a tray.</p>

Low Complexity Chairs

Leckey - **PAL**
Childrens
Seat

An adjustable chair suitable for children with mild to moderate postural support needs. Features a wooden frame, angle adjustable backrest, adjustable seat depth, height adjustable legs, footplate, armrests, and bright upholstery.

Available in size small and medium. A range of accessories are available including lap belt, side pads, ramped cushion, and pommel.

Sizes 1, 2 and 3

Smirthwaite -
Juni Chair

A wooden framed chair with a padded contoured vinyl seat and backrest.

The backrest features adjustable lumbar support and recline.

The seat height and depth are adjustable.

The armrests are made of wood and are height adjustable.

An optional footrest is available as shown.

Equipment measurements: - H 47CM W 58CM L 55CM (CHAIR)

<p>Special Tomato Soft Touch - Booster Seat with Liner Back</p>	<p>The Special Tomato Soft Touch Booster Seat with Liner Back is comfortable yet supportive seating solutions that are Latex Free, seam free, peel-resistant and impermeable to fluids. They are soft to touch for comfort, but also durable and hygienic as they are made of anti-microbial material. The Booster seats are easily cleaned with common disinfectants and so are great for use with multiple children.</p> <p>Assist in promoting proper head, neck and trunk alignment</p> <p>Can be attached to a standard chair with attachment straps</p> <p>Can be attached to the optional Tilt wedge or Mobile tilt wedge</p>	
<p>TREC Kinder Chair</p>	<p>The TREC chair is suitable for a child who needs a kinder chair with extra support.</p> <p>It has adjustable armrests, footplate, and pommel and is available in various sizes.</p> <p>It is height-adjustable to enable a child to sit at a kinder table and participate in group activities.</p>

<p>HIGH COMPLEXITY</p> <p>Jenx - Ladybird Floor Sitter</p>	<p>The ladybird is a prone (forward-tilted) floor sitter suitable for a child who needs support to sit straight-legged on the floor and requires a prone angle to assume correct posture.</p> <p>It can be adjusted to accommodate a child from approximately 6 months to 3 years and includes a range of adjustable positioning supports.</p> <p>The ladybird has a tray to enable access to toys.</p> <p>Equipment measurements: - H 50CM W 60CM L 90CM</p>	

**HIGH
COMPLEXITY**

Tumble
Forms Floor
Sitter and
Easel Table

The Tumble Forms Floor Sitter is suitable for a child who needs extra support for floor sitting and cannot tolerate a fully upright position.

It is available in three sizes (the range accommodates children from approximately 6 months to primary school age), and the seat can be positioned on the base in varying degrees of recline.

The Tumble Forms Floor Sitter can be used with an easel table, as shown to allow access to toys and activities.

Equipment measurements: -

Size 1 H 43CM W 43CM L 60CM including base

Size 2 H 47CM W 43CM L 65CM including base

Size 3 H 60CM W 43CM L 70CM including base

<p>MODERATE COMPLEXITY</p> <p>Scallop Seat</p>	<p>The Scallop is suitable for children who require a little extra help while floor sitting or sitting on a chair.</p> <p>This product is also great for children with learning or behavioural disorders as it provides tactile stimulation which helps to reassure the child and enable them to relax and concentrate while using the product.</p>	 A red, quilted, bowl-shaped seat with a black strap. The seat is shown from a top-down perspective, highlighting its circular shape and the grid-like pattern of the red fabric. A black strap with a buckle is visible at the bottom of the seat.
---	---	--

<p>LOW COMPLEXITY</p> <p>Bilibo Seat</p>	<p>Deceptively simple and magically attractive, Bilibo’s iconic shell shape and bright colours immediately appeal to children.</p> <p>Bilibo arouses curiosity, engages the imagination and playfully trains basic motor skills and balance.</p> <p>Both boys and girls find unlimited ways to play with Bilibo – using it to rock and spin in, hide under, sit on, tote with and peek through.</p> <p>Bilibo provides hours of fun, indoors and outdoors.</p>	
<p>LOW COMPLEXITY</p> <p>Bumbo Chair</p>	<p>Bumbo chairs can be used on any flat ground level surface. They are a lightweight, portable plastic seat suitable for babies four months and older.</p> <p>It is shaped to support the baby when sitting. Available in only one size.</p> <p>The baby must have independent head control before using this product.</p> <p>Equipment measurements: - H 20CM W 13CM L 13CM</p>	

<p>LOW COMPLEXITY</p> <p>Karibu Seat with Tray</p>	<ul style="list-style-type: none"> • Lightweight and portable • To support unstable sitting posture. The baby must have independent head control before using this product. • Easy to care • Stains can be easily wiped off with a wet towel <p>Size: L44.5 x W34.7 x H23cm</p>	
<p>LOW COMPLEXITY</p> <p>Mamas & Pappas Booster Seat with Tray</p>	<p>Four independently adjustable non-slip feet let you sit on any chair.</p> <p>This seat has a lightweight body with a carry handle.</p> <p>Great as they grow - soft and comfortable padded insert for use from 6 months to 3 years.</p> <p>Extra safe - two chair harnesses' make sure they stay put.</p> <p>Age Suitability: 6 months or when a child can sit unaided - 3 Years Approx.</p>	

<p>LOW COMPLEXITY</p> <p>Move'n' Sit Inflatable Cushion</p>	<p>An inflatable wedge which serves as a seat wedge and encourages an upright posture.</p> <p>The upper surface is bumpy and provides tactile feedback while undertaking other activities.</p> <p>Available in a standard size and a junior size as shown.</p> <p>Equipment measurements: -</p> <p>SMALL: - H 7CM W 25CM L 26CM</p> <p>JUNIOR: - H 1CM TO 6CM W 26CM L 26CM</p>	
--	---	---

<p>Positioning System</p> <p>Leckey Firefly Playpak</p>	<p>This lightweight bag contains an entire activity centre.</p> <p>Inside you will find rolls, wedges, and supports (designed by clinical experts) that stick together in dozens of different ways to let you and your child practice the early positions which form the building blocks for later abilities.</p> <p>Equipment measurements in bag: - H 20CM W 45CM L 45CM</p>	
--	--	---

<p>Positioning System</p> <p>Wedge with Detachable Headrest</p>	<p>Allows patient to be positioned in prone - good positioning for eliminating the effect of gravity present when individual is upright.</p> <p>Allows patient to be positioned to stretch flexed hips and knees. Scoop shape decreases chance that child could roll off wedge.</p> <p>Headrest is useful for child with poor head and neck extension.</p> <p>Equipment measurements: - H 30 CM (at high end of wedge) W 43CM L 150CM</p>	 A photograph of a red and yellow positioning wedge. The wedge is made of a smooth, possibly plastic or vinyl material. It has a yellow top surface and a red side surface. Two blue straps with buckles are attached to the red side, and one green strap with a buckle is also attached. The wedge is resting on a light-colored wooden surface. In the background, there are shelves with various items, suggesting a clinical or hospital setting.
--	---	---

<p>Accessories and Other:</p> <p>Jenx - Nursery Tables</p>	<p>The Jenx Nursery Table is available in two sizes to work with the Jenx Corner Seats.</p> <p>It's a sturdy table with a large, clear surface area that is big enough for a child to play or work at most activities with ease. The table (and its surface) are ideal for drawing and writing activities.</p> <p>Equipment measurements: - H 45CM W 70CM L 50CM</p>	
---	--	---

3. Standing Frames

Multi-Standers, Sit-to-Stand Standing Frames, Supine Standers, Prone Standers and Upright Standers

EasyStand –
Supine /
Full Standing
Bantam Stander
/ Chair

The Bantam line of standers are the only sit to stand standers that can combine the option of supine positioning to create infinite positioning possibilities from 90-90 sitting, fully vertical standing, full supine lying and anywhere in between.

No other standers can provide the amount of positioning that is possible with the EasyStand Bantam.

Jenx -
Multistander –
Supine / Prone /
Upright
Standing
System

This standing frame is suitable for children between the ages of nine months and six years old.

It can be configured to support supine, prone, and upright standing with two types of headrests.

The Multistander also allows for a tray to be attached in the supine, prone and the upright position.

Equipment measurements when closed down: - H 80CM W 58CM
L 76CM

Leckey -
Squiggles
Standing Frame
– Prone /
Upright / Supine

The Squiggles Stander is a bright colourful three-in-one stander for younger children.

This versatile, adjustable stander offers prone, upright, and supine standing in one product, allowing the therapist to offer standing therapy to address a child's needs and support inclusion.

Equipment measurements: - H 110CM W 60CM L 130CM

DES - Supine
Standing Frame

The DES Supine Standing Frame is a supine (reclined)/upright standing frame suitable for a child who needs support to stand and may not be able to tolerate a fully upright position and includes a range of adjustable positioning supports.

It can be adjusted to enable a standing position from horizontal to fully upright.

The DES supine standing frame has an activity tray to allow access to toys.

Equipment measurements: - H 106CM W 40CM L 70CM

<p>Jenx - Supine Stander</p>	<p>The Jenx Supine Stander is a robust stander with comfortable, adjustable accessories to provide safe standing to suit children with a wide variety of needs. While supported and upright, children can participate in a range of activities.</p> <p>Available in two sizes to suit children from 9 months onwards.</p> <p>A robust stander with a range of accessories including trays to suit a variety of needs.</p> <p>Equipment measurements: - Size 1 H 96CM W 70CM L 106CM</p>	 A photograph of the Jenx Supine Stander, a child support device. It features a bright pink plastic seat and backrest with black adjustable components. The stander is mounted on a black metal frame with four casters for mobility. A grey tray is attached to the front, holding a yellow bowl. The device is shown against a plain white background.
------------------------------	---	---

<p>Jenx – Prone - Humphrey Standing Frame</p>	<p>The Humphrey is a prone (forward-tilted) upright standing frame suitable for a child who needs support to stand and may not be able to tolerate a fully upright position.</p> <p>It can be adjusted to accommodate a child from approximately 3 to 7 years, and includes a range of adjustable positioning supports. It can be adjusted to enable a standing position from horizontal to fully upright.</p> <p>The Humphrey standing frame has an activity tray that can be used either with an insert to create a flat play surface, or with a bowl for sensory play.</p>	
---	---	---

Jenx – Prone -
Monkey
Standing Frame

The Monkey is a prone (forward-tilted) upright standing frame suitable for a child who needs support to stand and may not be able to tolerate a fully upright position.

It can be adjusted to accommodate a child from approximately 12 months to 5 years, and includes a range of adjustable positioning supports.

It can be adjusted to enable a standing position from almost horizontal to fully upright.

The Monkey Standing Frame has an activity tray that can be used either with an insert to create a flat play surface, or with a bowl to allow sensory play.

Equipment measurements: - H 72CM W 58CM L 87CM

Jenx - Prone -
Standing Frame

The Jenx prone standing frame is a prone (forward-tilted) upright standing frame suitable for a child who needs support to stand and may not be able to tolerate a fully upright position.

It can be adjusted to enable a standing position from upright to 40 degrees.

The Jenx prone standing frame has an activity tray and bowl to allow access to toys.

Equipment measurements: - H 95CM W 65CM L 95CM

Jenx – Prone -
Rabbit Stander

The Jenx Rabbit Paediatric Mobile Stander is a secure, reliable, and easy-to adjust standing aid that supports special needs children in the vertical and prone positions.

The tray comes with a bowl insert.

Equipment Measurements: - H 60CM W 38CM L 55CM

DES – Prone -
Standing Frame

This prone standing frame features multiple adjustments on all components to grow with the child.

It consists of a wooden frame, padded vinyl supports, and quick release straps with buckles.

Frame incorporates a manually operated tilt adjustment with a positive locking mechanism and a solid back support to hold child in position.

Mobile frame folds flat for storage.

Equipment measurements: - H 96CM W 55CM L 73CM

Dynamic /
Chattanooga –
Upright
Standing Frame

The Dynamic Standing Frame is suitable for a child who needs support to stand, and is designed to allow the child some movement.

It is available in the small and medium size and can be adjusted in height. Another option is the Standing Frame can be attached to a platform with wheels for easier mobility.

The Dynamic Standing Frame can be used with a Taddy height adjustable cut out table, or it can be pushed up to an easel, water trough or high table to allow access to activities with other children.

Equipment measurements: - H 60CM W 43CM L 60CM

Jenx – Upright -
Penguin
Stander

The Jenx Penguin Stander has been designed to provide excellent support for children in upright standing, and the range and support of adjustment options available creates a product that is suitable for children aged 18 months to 4 years.

4. Tables and Desks

Tables and Desks		
<p>DES - Height Adjustable Easel Table</p>	<p>The height adjustable easel table provides a slanted surface for activities such as drawing and reading.</p> <p>It is angle-adjustable, bringing activities into the child's line of vision, improving posture and encouraging fine motor development.</p> <p>Equipment measurements when closed down: -</p> <p>H 26CM W 62CM L 42CM</p>	

<p>Height Adjustable Table with Fold Down Pin Legs</p>	<p>Height adjustable with fold down legs to provide flexibility with ensuring the table is at the correct height for the child.</p> <p>Equipment measurements: - H Adjustable W 115CM L 70CM</p>	
<p>Height Adjustable Table (with wheelchair cut out)</p>	<p>Height adjustable table with left or right hand cut out for power wheelchair control.</p>

--------------------	---	---

5. Toileting and Change Tables

Toileting		
<p>Electric Change Table</p>	<p>The electric change table is suitable for a larger child who is able to do a standing transfer to and from the change table, reducing the need for lifting.</p> <p>It has an electric height-adjustment mechanism to enable it to be lowered for transfers and raised to a suitable working height for nappy changes. Cot sides or rails provide extra security.</p> <p>The electric change table is fitted with castors to enable ease of movement for storage. Various sizes stocked in Library.</p>	
<p>Flamingo Toilet Chair</p>	<p>The R82 Flamingo Toilet chair provides extra toileting support.</p> <p>It is available in several sizes to accommodate children from approximately 3 years to adolescent. It has a range of adjustable positioning supports, and can tilt in space.</p> <p>It can be used as a free-standing commode or positioned over the toilet.</p> <p>Equipment measurements: - H 125CM W 48CM L 76CM</p>	

Platform Step
and Rails

This multi-purpose step up platform has support handrails on both sides to give 240mm extra height.

It is designed to step up to toilets, washbasins, tables, and other areas where a sturdy, stable step is required. It has a slip resistant surface.

Equipment measurements: - H 55CM W 51CM L 75CM

Potty Infant
Chair -
Adjustable

Contoured fibreglass mounted seat, mounted on zinc treated, epoxy coated steel frame. Three sizes available with optional chest strap available.

Fits most toilets when fitted with adjustable legs.

Adjustable legs measurements are 60 – 240 mm height to potty chair.

<p>Rifton Blue Wave Toileting System</p> <p>(Small and Large Chair Systems)</p>	<p>The Blue Wave Toileting System is suitable for a child who needs extra support for toileting.</p> <p>It is available in two sizes to accommodate children from approximately 3 years to adolescent, and has a range of adjustable positioning supports. It can be used with or without a mobile frame.</p> <p>With the mobile frame it can be used as a free-standing commode with a potty attachment, or as an over-toilet commode without the potty attachment.</p> <p>Without the mobile frame the seat can be mounted on the toilet.</p> <p>Equipment measurements: - H 105CM W 57CM L 70CM</p>	
---	--	---

Toilet Support -
High Backed

Supplied with a harness for full trunk support.

Smaller model is intended for children up to 10 years.

Reduced seat depth (RSD): sits 4" forward to lessen seat depth when attached to U-Shape Mounting Base.

Dimensions of supports: height adjustable 19-24 inches; width at top 8" and width at bottom 12".

Toilet Support -
Low Back

Designed to fit any school toilet, the toilet supports strong and secure frame allows it to be easily adjusted for maximum user control and comfort, and also allows the low back toilet support to be quickly removed when not in use for easy storage.

6. Manual Handling Aids and Appliances

Manual Handling Aids and Appliances		
Hoists – Battery Operated - Rechargeable	<p>The mobile hoist is suitable for situations where manual lifting of a child is not viable, usually for a larger child who is not walking and is unable to do a standing transfer.</p> <p>It is useful for lifts across short distances, usually to and from specific positions, for example from chair to change table or chair to floor.</p> <p>Slings are available in a variety of styles depending on the amount of support required.</p> <p>The mobile hoist is powered by a rechargeable battery and is operated with a hand-held control.</p> <p>Equipment measurements: - H 50CM W 65CM L 105CM</p>	 A mobile hoist device with a white frame, four wheels, and a black sling. The device is designed for manual handling of a child, featuring a hand-held control and a rechargeable battery.

<p>Hoisting Slings</p>	<p>Manufactured under the highest quality control standards.</p> <p>The extremely durable slings come in a range of fabrics and sizes to suit the individual child when used in conjunction with an electric powered hoist to assist educators and staff with toileting needs.</p> <p>Various sizes stocked in Library.</p>	
<p>Wheelie Stool</p>	<p>The wheelie stool is a mobile, height-adjustable stool designed to enable staff to work with children without bending or twisting.</p> <p>It has a wheeled base, an upholstered seat which can swivel a full 360 degrees and gas-assisted height adjustment.</p> <p>It enables staff to work at the level of the child for feeding, seated activities, and supported standing and walking.</p>	

Wooden Stool

Height adjustable with screws with a vinyl padded seat and a wheeled base for educational staff.

Equipment measurements: - H 36CM W 40CM L 14CM

7. Physical Activity Devices

Bicycles, Full Support Swings, PMP Gross Motor Steps and Ramps

Supportive Tricycle

The Supportive Tricycle is suitable for a child who is unable to use a regular tricycle.

It can be adjusted to accommodate a child from approximately 3 to 6 years, and includes a range of adjustable positioning supports.

The Library stocks a variety of sizes.

<p>Full Support Swings</p>	<p>The Full Support Swing seat is suitable for a child who needs a swing seat with extra support.</p> <p>It is available in three sizes (the range accommodates children from approximately 2 years to adult) and provides trunk and head support.</p> <p>The full support swing seat will fit onto standard “pigtail” swing hooks and can be adjusted in height and angle of recline.</p> <p>Equipment measurement: - H: 56CM x W: 33CM x L: 30 weight limit 45KG</p>

8. Bead and Mirrored Stands

Bead and mirrored stands

Bead Chain
Stand with
Lights and
Music

These popular bead chains have a unique design for users who can reach through to the base.

When a hand passes over the light sensor, a red light blinks and music plays. This provides wonderful visual, auditory and tactile experiences.

Height: 30cm

Requires 4 size AA Batteries

<p>Sensory Plate Switch</p>	<p>Provides stimulating feedback! Specially-designed for the individual who requires exceptional sensory input, this 13cm x 20cm bead chain and unbreakable plastic mirror plays music, small red light is activated and the unit vibrates when touched. The Sensory Plate can also be used as an external switch without vibration, music and/or lights when connected to a toy or device.</p> <p>Size: 30cm x 21cm x 7.5cm.</p> <p>Requires 2 size C Batteries.</p>	
<p>Mirror with Beads and Lights</p>	<p>Encourages exploration!</p> <p>Mirror provides tactile and visual reinforcement. Playing with the beads will activate lights, vibration and music, while the soothing chains provide unique tactile stimulation. Vibration sensitivity is adjustable.</p> <p>Can be used as a switch to activate devices. Can be used on the floor or a table. Lights, vibration and music can be turned on or off by hidden switches.</p> <p>Requires 6 size AA Batteries.</p>	

Multi Bead Chain Lights and Music

This innovative Multi Bead Chain is great for developing the concept of cause and effect.

Movement of the beads will turn on a built-in music box. As long as the beads are making contact with the metal bar, the music stays on. Can also be used as an external capability switch without music when connected to any toy or device.

Size: 32cm H x 37cmL x 27cmW

Requires 2 size AA Batteries

'Razzle Dazzle'
Bead Chain
with Music

The Razzle Dazzle Bead Chain Curtain provides hours of somatosensory stimulation.

Moving the beads will turn on a built-in music box. These colourful beads are inviting to reach for and touch, and help teach cause and effect.

Works as a switch or as an independent toy. When used as a switch, the movement of the beads activates the music as well as an external toy or device.

Size: 37.5cm tall x 27cm x 32cm Requires 2 size AA batteries

9. Switch Adapted Toys and other Toys

Switch Activated Communication Devices and Toys

Compact
Activity Centre
– Sensory Toy

Specially designed for children with limited mobility.

This small-scale activity centre is designed to provide sensory stimulation and cognitive activity. Great for the user whose physical mobility may be limited due to positioning needs.

Features a bead curtain, a dome with brightly-coloured sequins which spin when the button is pressed, a textured plate which vibrates and lights up when pressed, and a pull ball that turns on a music box.

Requires 2 size C batteries to operate.

<p>Five Function Activity Centre – Sensory Toy</p>	<p>There are 5 different switches built into the brightly coloured activity centre. Each has a different function that has been designed to stimulate sensory awareness, hand-eye coordination and aid in teaching cause and effect:</p> <ul style="list-style-type: none"> • The bright yellow plate activates a built-in AM/FM radio. • The large red plate vibrates when pressed. • Moving the wooden roller sounds a buzzer. • A pull ball turns on a music box. • The large orange plate turns on a light. <p>Size: 96.5 x 71 x 10 cm</p> <p>Requires: 2 size C batteries</p>

12. Switches and other Accessories

Accessories		
<p>Big Keys Computer Keyboard</p>	<p>Big keys keyboards for computer access provide users large, high-visibility keys that are easy to see.</p> <p>In addition, for users who lack fine motor movements, the larger keys provide a larger strike area that is easier to access compared to standard keyboards.</p>	
<p>Campus SX and Microphone Boom with Case</p>	<p>Campus SX is a dedicated Phonak FM transmitter for educational applications when used in combination with Micro Boom.</p> <p>Professionals, teachers, educators and children benefit from maximum flexibility and user comfort.</p>	

Computer
Mouse
Assistance -
Switch
Adapted
Version

The BIGtrack Trackball Switch Adapted has a 3 inch trackball which makes it the largest trackball available. The large ball requires less fine motor control than a standard trackball and it is ruggedly built. It has a left and a right mouse click button located behind the trackball to avoid unwanted mouse clicks. The BIGtrack trackball also allows for 2nd Mouse Connection both the BIGtrack and a second mouse can be connected allowing simultaneous participation. The bright large 3" trackball helps to make mouse movements easy and accurate. While the oversized buttons make mouse clicks simple for those with poor motor control. For even more access this switch adapted version comes with two standard 1/8" plugs for two switches. Its left and right mouse clicks have been adapted so that you can use a switch for activation. This large trackball is also perfect for kids of all ages, especially children in preschool. The large trackball is easy on little hands and is simple to use.

The BIGtrack Switch Adapted is easy to install and works on any Windows or Macintosh computer that has a USB or PS/2 port.

Phonak
Digimaster
5000 kit
including
Speaker with
stand and
Pass-around
Mic

The Phonak' s DigiMaster 5000 innovative loudspeaker array features no less than 12 individual high-quality loudspeakers, all housed in a robust aluminium frame.

The DigiMaster 5000 array emits cylindrical sound waves at the most important speech frequencies, ensuring that the required sounds are carried effectively across a large area, while generating very little speech-hindering 'late reverberation' or echo. The DigiMaster 5000 is supplied with a sturdy floor stand

The Pass-around Mic can be handed from one child to another, allowing the child who is wearing Roger Receivers to hear not only the teacher/educator but also other children's comments.

<p>Little Step by Step Communicator</p>	<p>Record any series of messages directly into the Little Step-by-Step Communicator and press its activation surface for the first message. Press it again and Step-by-Step automatically plays the next message in a sequence.</p> <p>Step-by-Step communicators allow children with even the most limited communication abilities to take turns in "an essential conversation."</p> <p>Each message in the sequence can be as long or short as needed.</p> <p>The total number of messages is only limited by the 2 minute recording time.</p> <p>Requires batteries to operate equipment.</p>	 The image shows a black, dome-shaped electronic device with a large red button on top. The device has the text "Little Step by Step" printed on its side. In front of the device are three smaller, flat, circular buttons in yellow, green, and blue.
---	--	--

<p>Switch – Big Mac Communicator</p>	<p>Record any single message directly into the Big Mac and press its large activation surface for up to 2 minutes of playback.</p> <p>Students with visual disabilities and those who require a larger activation surface will have no problem connecting with BIG Mac communicator's large, 13cm (5-inch) activation surface as they connect with teachers, educators, children, and the world around them.</p> <p>Requires batteries to operate switch.</p>	
<p>Switch – Big Red</p>	<p>Large colourful surface makes this switch ideal for children with visual, cognitive, or physical requirements.</p>	

<p>Switch – Jelly Bean</p>	<p>Low profile circular switch on mounting plate for wheelchair tray or table top. Responsive across entire surface.</p> <p>Range of colours available. Switch can be mounted on small triangular plate, or two or four-place rectangular plate.</p> <p>Twist model enables switch tops to be interchanged with one of a range of colours.</p>	
<p>Switch - Smiley face</p>	<p>Switches enable children with severe disabilities to experience cause and effect, to play and have fun, and to interact with their environment.</p>
